

NELSON GONZALEZ

Fullstack Developer | React · Next.js · TypeScript · Node.js

Caracas, Venezuela (Open to Remote) | +58 424 255 5639 | njeanpierre23@gmail.com | linkedin.com/in/nelson-jpgonzalez

SUMMARY

Full-stack developer with 8 years of experience building production web applications, frontend-focused with solid backend skills. Specialized in React, Next.js, and TypeScript, with a strong focus on front-end architecture, design systems, and automated testing (Playwright, Cypress). Builds APIs and services with NestJS and Express on MongoDB and PostgreSQL. Former front-end team lead with experience mentoring engineers and teaching full-stack development. Currently working with AI-assisted development using Claude Code and Spec-Driven Development, including custom Claude skills for design-to-code workflows.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, Redux, React Query, Ant Design, Material UI, Tailwind CSS, styled-components, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs, MongoDB, PostgreSQL, Redis, Strapi CMS

Testing: Playwright, Cypress, Unit Testing, End-to-End Testing, Test Automation

Cloud & DevOps: AWS (Cognito, S3), GCP, GitHub Actions, CI/CD, Git

AI Tooling: Claude Code, Spec-Driven Development, OpenAI Codex, AI-Assisted Development

Practices: Front-End Architecture, Design Systems, Responsive / Mobile-First Design, Code Review, Mentoring, Agile, Figma

PROFESSIONAL EXPERIENCE

Fullstack Developer | Atmosera (formerly Hikru, merged March 2026)

Remote (United States / Costa Rica) | Sep 2025 – Jul 2026

- Built the project's base theme and design system on top of Ant Design and Tailwind CSS, establishing reusable UI foundations for the team.
- Delivered complete feature modules with AI-assisted development using Claude Code and Spec-Driven Development.
- Wrote unit and end-to-end tests with Playwright to validate critical user flows.
- Reviewed code and led technical discussions on architecture, performance, and reusable code patterns.

Frontend Developer / Front-End Team Lead | Teravision Technologies

Caracas, Venezuela (Remote) | Apr 2020 – Jun 2025

- Led the front-end team, defining architecture guidelines, development standards, and code review practices across client projects.
- Mentored engineers through pull request reviews and technical discussions on architecture, performance, and clean, reusable patterns.
- Wrote unit and end-to-end tests with Cypress.

Dubsado – CRM for small businesses (React, TypeScript, Express.js, React Query, Redux, MongoDB, Redis, GCP)

- Built complex workflow modules on a microservices-based platform, including a workflow editor, to-do app, settings interface, notifications, and embeddable widgets.
- Improved rendering performance by eliminating unnecessary re-renders through memoization and controlled state updates.
- Built Express.js routes, input validation, and business logic together with the backend team.

Teravision Corporate Website (Vue.js, Nuxt.js, Strapi CMS, Express.js, Tailwind CSS)

- Rebuilt the corporate website with SSR and ISR for faster load times and stronger SEO, and defined the project architecture and coding guidelines.
- Extended Strapi CMS modules with custom data fetching and integrated CKEditor for content authoring.
- Integrated the Greenhouse API to sync the company's job openings in real time.

Creator Spaces – Content scheduling platform for creators (Next.js, TypeScript, Material UI, React Query, Redux, MongoDB, AWS)

- Built a dynamic media gallery and a scheduling calendar with Next.js and TypeScript.
- Integrated AWS Cognito for user authentication, token handling, and session persistence.

- Built a Chrome extension to manage session data for third-party platform integration, learning the technology from scratch to deliver a working demo under a tight deadline.

Fullstack Developer | Sistran Digital

Remote | Feb 2021 – Nov 2022

- Built an insured-client portal in React with a dashboard, Google Maps integration, and policy management views for health insurance customers.
- Integrated a third-party KYC provider to automate identity verification and document validation, strengthening onboarding security and compliance.
- Built a dynamic quote generator for insurance agents that produced personalized quotes from selected coverage options.
- Developed Express.js routes, input validation, and business logic with the backend team (React, Express.js, Material UI).

Fullstack Developer | RooTech Services

Caracas, Venezuela | Oct 2018 – Mar 2020

- Designed the front-end architecture for a payments application, establishing coding standards and project structure for the team.
- Built a reusable React component library that reduced code duplication and improved visual consistency across projects.
- Contributed to database design, defining models and relationships, and supported API design and business logic.
- Developed custom WordPress websites and WooCommerce plugins extending standard e-commerce functionality.

TEACHING

Senior Mentor (Lead Teacher) | 4Geeks Academy

Remote | 2021

- Taught full-stack development (React, JavaScript, HTML/CSS, Git, Python/Flask, SQLAlchemy) through hands-on, real-world projects, emphasizing clean and maintainable code.

EDUCATION

Computer Engineering (Ingeniería en Informática, 5-year degree) | Colegio Universitario de Caracas | 2011 – 2016

CERTIFICATIONS

- Deploying Web Applications on AWS
- Cloud CI/CD with GitHub Actions
- Agentic Frontend Development with Codex
- Advanced React: Design Systems, Design Patterns, and Performance
- React PRO

LANGUAGES

Spanish (Native) | English (Intermediate)
